Spring Showers & Sunshine

We don't know about you, but we're patiently waiting on consistent sunshine. Although, we don't mind some of the rain as our city is currently very dry and we need some showers to clean up our dusty streets. On another note: we hope everyone was able to secure their camping spots for the upcoming warm months!

To ensure a safe drive to and from your Spring activities, we'd like to give a friendly reminder to check up on your vehicle's maintenance prior to hitting the roads; whether that means coming in for a full vehicle check-up, replacing your brake pads, getting an oil change/coolant re-fill or booking an alignment check.

Winter is harsh on all kinds of parts and systems and if you've found out after a battery test that it isn't at full voltage, it could be a problem with charging. The alternator or serpentine belt may not be in the greatest condition anymore, or the tension may not be enough due to a weak or seizing pulley or tensioner.

Ultimate Car Care So You Can Have Safe and Breakdown Free Driving

# Spring Maintenance Checklist

## Get Battery Tested

At this point, the battery may be weaker than it was entering the winter season and it may not last through the stressful summer when loads from heater fans and the AC compressors are consistent.

## Check Ignition & Caps

Check your spark plugs and wires. Your ignition system works hard. Spark plugs fire millions of times, and inefficient spark plugs can cost you performance and fuel mileage. Check all your caps. Gas caps, radiator cap, brake fluids and more. Anywhere fluids are poured should be checked for a tight seal. This will keep out water and debris and keep your car running smoothly. Faulty components can make starting your car a game of chance, and can even cause a breakdown.

## Switch Back to All-Season Tires

Timing is everything ~ Once the temperature is consistently above 7 °C, it's time to switch back to all-seasons. Driving winter tires on dry pavement in warmer temperatures will wear them out faster, which means buying a new set sooner. Changes in temperature create fluctuations in air pressure; improperly inflated tires are a problem. Keep them at the proper levels for better gas mileage.

## Check Brakes

After the temperatures have reached bearable levels, examine the effects of the winter season on the vehicle. If the brakes look worn out or loose performance, have them replaced. If any unusual noises or sparks are coming from the brakes, have them inspected right away.

## Check Headlights

Make sure all your interior and exterior lights are working.

For safe driving, ensure your headlights are aimed correctly.

## Check Filters

It's spring – your car deserves to breathe fresh air, too! Check the air filter and the cabin air filter.

## Check the Fluids

Spring car maintenance is a good time to double-check your vehicle's engine fluids more than once per year and ensure they're completely topped up. That includes *brake fluid, transmission fluid, power steering fluid, windshield washer fluid and radiator fluid.*

## Replace Wiper Blades?

New wiper blades can really increase visibility on rainy days. If your wipers are leaving streaks on your windshield, it may be time to get new wipers installed on your vehicle.

## Time for an Oil Change?

It used to be normal to change the oil every 3,000 miles, but with modern lubricants most engines today have recommended oil change intervals of *5,000 to 7,500 miles.*

Moreover, if your car's engine requires full-synthetic motor oil, it might go as far as 15,000 miles between services!

## Check Exhaust System

Typically, a normal exhaust system will last anywhere from **two to three years**. However, it is important to check your exhaust system periodically for any damage.

## Check Cooling System

The cooling system should be maintained as follows: Regularly check the radiator, belts and hoses and have them replaced when they show signs of excessive wear or aging. Replace the drive belt (also known as the serpentine belt) before it breaks.

## Why is it important to perform Spring maintenance on vehicles?

After a long, cold winter, your car needs some TLC before you hit the road this spring and summer. Spring is the perfect time to bring your car into your local auto repair shop *to address the consequences of cold temperatures, icy conditions, road salt and sand before they become serious issues.*

### \*\*\* UPCOMING \*\*\*

## Winnipeg Concerts & Other Local Events

**Sat. May 4 & Sun. May 5 630PM,**  
Winnipeg Comedy Festival  
**Thurs. May 9 10AM,**  
Downtown Farmer's Market

v.s. Lake Country DockHounds  
**Thurs. May 30 8PM,** Shawn Desman  
**Fri. May 31 & Sat. June 1 9PM,**  
Dancing Queen Winnipeg: ABBA x  
Queen Dance Party at Park Theatre

## Braised Five Spice Beef

**Prep Time: 20 minutes Total Time: 2.5 Hours 4 Servings**

*For extra flavour, leave the braised beef in the sauce overnight in an airtight container in the fridge. Reheat the beef before slicing.*

**Ingredients:**

- |   |  |
|---|--|
| 3 star anise pods, 1 pc ginger peeled   | 2 1/2 lbs boneless beef shank, cut into 4 pieces |
| 6 fresh red Thai chilies, thinly sliced |  |
| 1 tbsp Sichuan peppercorns              | 1 cup light soy sauce, 1 1/2 tbsp sugar          |
| 2 bay leaves, 1 cinnamon stick          | 1/2 cup dark soy sauce & rice wine               |
| 12 cups water, more as needed (divided) | 8 garlic cloves, peeled and smashed              |

**Instructions:**

1. In a medium frying pan, combine the star anise, chilies, Sichuan peppercorns, bay leaves, cinnamon stick, and cardamom pod, if using. Toast over medium-high heat, stirring frequently, until fragrant, 2-3 minutes. Transfer the spices to a small plate and let cool. Place the spices in a spice bag. Set aside.
2. In a large pot, bring 6 cups of the water to a rapid boil over high heat. Add the beef and blanch for 4-5 minutes, until the scum has floated to the top. Drain the beef and rinse with cold water. Wipe the pot.
3. In the same pot, combine the light soy sauce, dark soy sauce, rice wine, garlic, ginger, sugar, the spice bag and the remaining 6 cups of water. Bring to a simmer over medium heat. Increase the heat to high, add the beef and bring to a boil. Reduce the heat to medium-low, cover with a lid, and simmer for 1½-2 hours, until the beef is soft and can be pulled apart with a fork.
4. Remove from the heat. Discard the spice bag. Transfer the beef to a cutting board and cut crosswise into thin slices. Serve immediately on top of rice or noodles and drizzle with the broth.

## On The Lighter Side

"Ultimate Car Care"

Q. What is a flower's favorite kind of pickle?  
A. A daffo-dill!

Q. Why are frogs so happy?  
A. They eat whatever bugs them!

Q. Why do golfers wear two pairs of pants?  
A. In case they get a hole in one!

Q. What season is best to go on a trampoline?  
A. SPRING TIME!

Q. What goes up when the rain goes down?  
A. Umbrellas!

Q. How did the bee brush his hair?  
A. With a honeycomb!

Q. What kind of flower should a boy give his mom for Mother's Day?  
A. A son-flower!

Q. What kind of garden does a baker have?  
A. A flour garden!

Q. How do you know flowers are friendly?  
A. They always have new buds!

Q. What's a tree's favorite drink?  
A. Root beer!

Q. What falls but never gets hurt?  
A. The rain!

Q. What do you call a rabbit with flees?  
A. Bugs Bunny!

Q. Where did the egg go for Spring break?  
A. New York City!

It's allergy season again!?!?  
You've got to be pollen my leg!

Q. What kind of bird should you never let into a jewelry store?  
A. A Robin!

Q. Why did the Spring breakers miss their flight?  
A. They had no Spring in their step!

My husband and I had a disagreement about whose turn it was to do the laundry. In the end, he threw in the towel.

Q. WHAT TRAVELED AROUND THE WORLD OVER SPRING BREAK BUT STAYED IN ONE PLACE?  
A. A STAMP!

Knock Knock!  
Whose there?  
Bean  
Bean who?  
Bean a long time since Spring was here!
